## Adult Patient Preparations

Please call WCRC:

- For child/pediatric preparations
- If you are or may be pregnant
- If you have any questions

Barium Enema:

- Pick-up prep kit from WCRC at least 48 hours before exam time.
- Follow all directions on kit.

Computed Tomography (CT/with Contrast):

- Please call WCRC if you are diabetic or are known to have allergies
- In some instances, a preparation is required.
- WCRC will instruct you if a preparation is necessary.
- Creatinine/BUN required for CT within 90 days if 60 or older, renal insufficient, diabetic or hypertensive.

DEXA:

- Patients should not be scheduled within two weeks of any diagnostic or CT exam utilizing Barium or any nuclear medicine exam.

HSG (Hysterosalpinogram/Hysterosalpinography):

- Nothing to eat or drink 4 hours prior to exam.
- Should be scheduled 7-10 days from the start of menstruation.

IVP (Intravenous Pyelogram):

- Pick-up prep kit from WCRC at least 48 hours before exam time.
- Follow all directions on kit.
- Please call WCRC before your exam if you are diabetic or allergic to iodine.

Magnetic Resonance Imaging (MRI):

- If you have a pacemaker, metallic implant, previous brain surgery, or have had metal fragments in your eyes, or known allergies to Gadolinium; please call WCRC prior to appointment time.
- Creatinine/BUN required for MRI within 45 days if 60 or older, renal insufficient, diabetic or hypertensive.
- No preparation is required unless sedation is needed.

Mammogram:

- Do not wear perfume, deodorant, or powder the day of exam. If new patient, bring previous mammogram films and report.
- Please wear two piece clothing.
- Do not schedule one week before menstrual period.
- Preparation for Breast Biopsy:
  - No aspirin or "blood thinner" one week prior to biopsy.
  - Please consult your physician prior to discontinuing medications.

Nuclear Medicine:

- Preparation varies, please direct questions to our Nuclear Medicine Dept.

PET/CT:

- Do not eat or drink anything for 6-12 hours prior to your exam, except water.
- Avoid strenuous activity 24 hours in advance of your study.

Ultrasound:

Abdomen Ultrasound:

- Nothing to eat, drink or smoke after midnight.
- No breakfast, smoking or gum chewing the morning of exam.

OB and Pelvic Ultrasound:

- 1 hour before exam time, empty your bladder and drink 32 oz. of water, finishing 1 hour prior to exam.
- Arrive with a very full bladder. Do not urinate.
- Pelvic ultrasound should not be scheduled during menstruation.

Prostate Ultrasound:

- Fleet's enema 1½ hour prior to exam.

Upper GI and/or Esophogram and/or Small Bowel Series:

- Nothing to eat, drink or smoke after midnight.
- For small-bowel series, allow at least 4 hours for exam.

WCRC is contracted with most insurance carriers. Call for more information.
